## 32" EDF Vampire Build photos

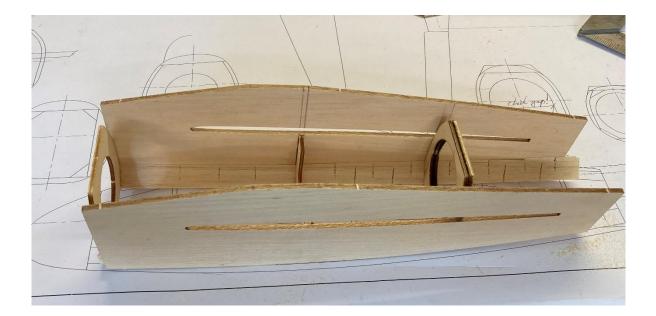

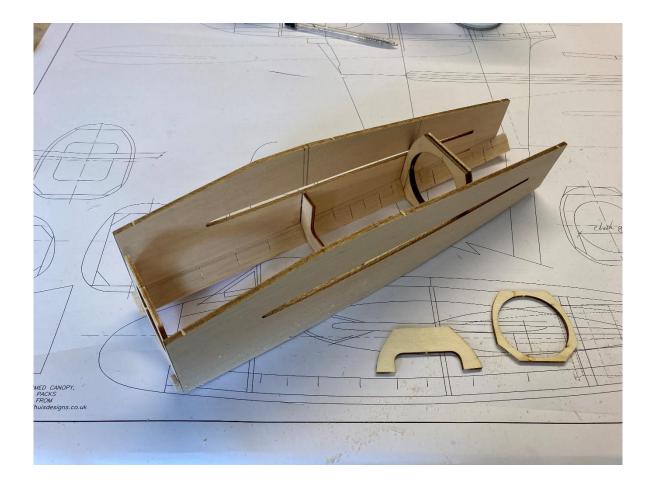

Just some of the useful tools needed plus a quality razor plane

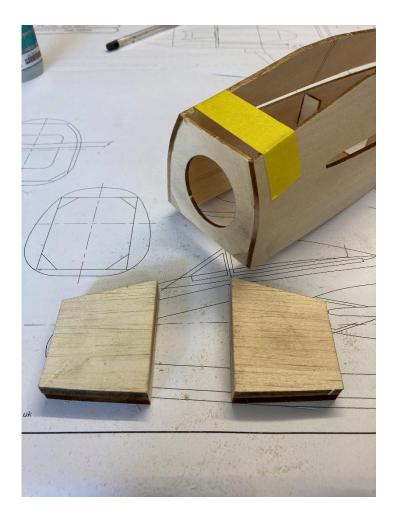

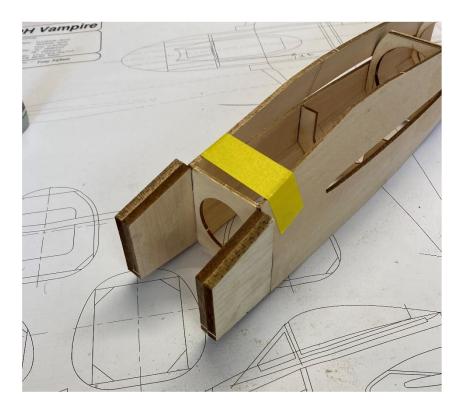

**FUSELAGE** 

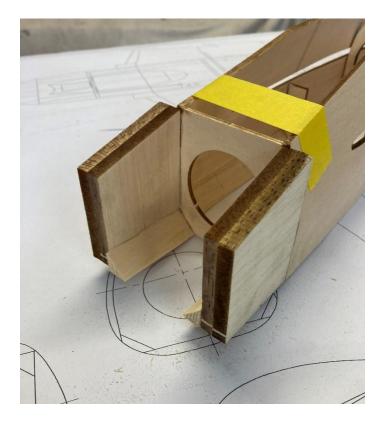

Mark out the formers positions on the fuselage sides and line the bottom with 12.5mm triangle

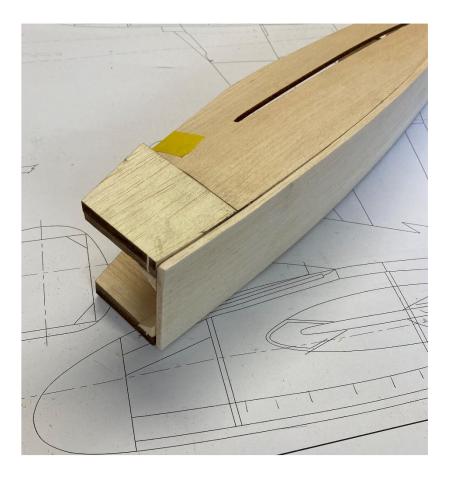

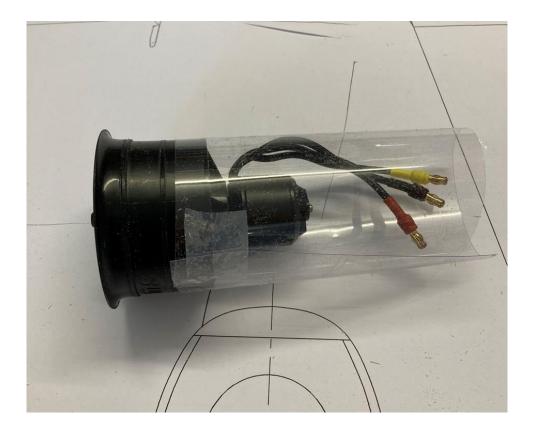

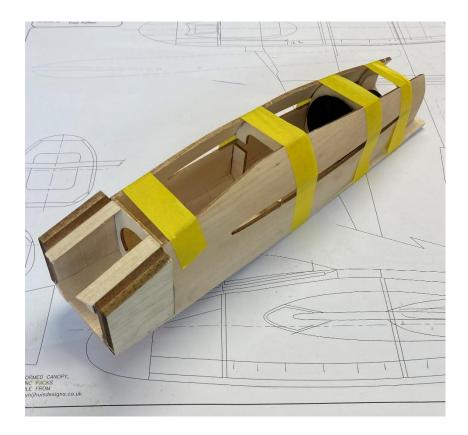

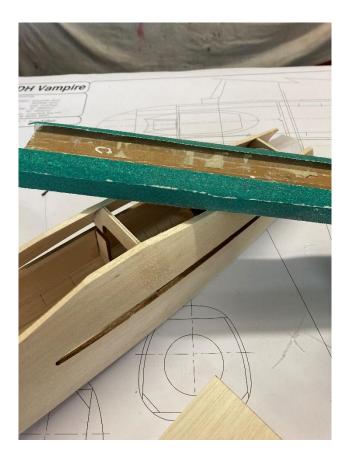

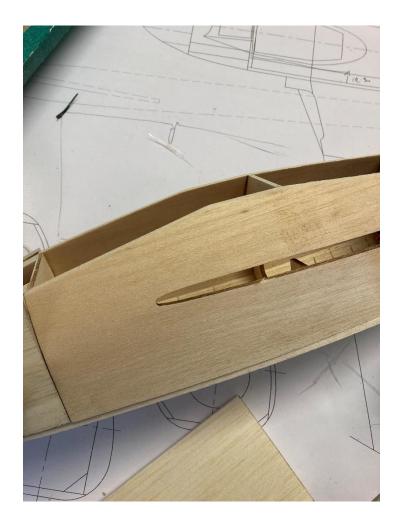

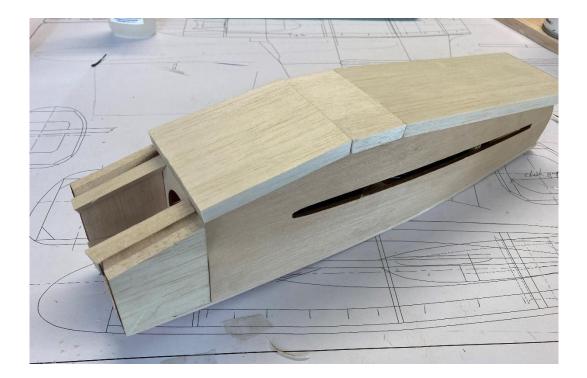

Use two piece of 6.5mm sheeting just showing through into the fuselage, to locate the top part of 9

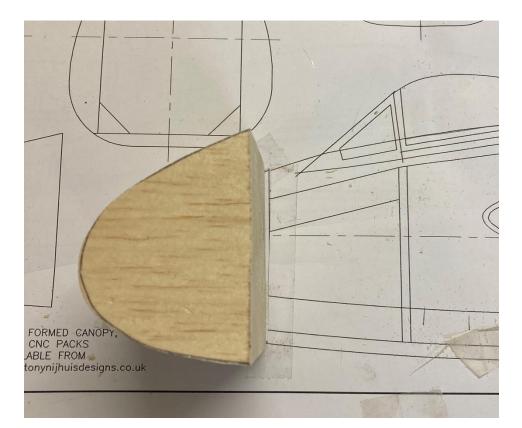

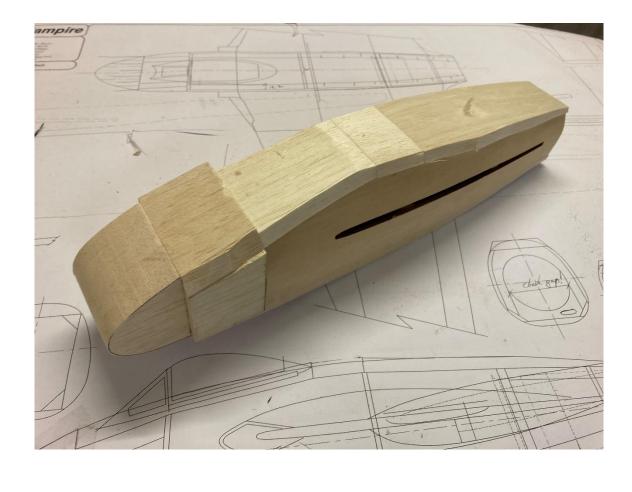

Modified shape triangle inserted to former 11

<u>WINGS</u>

Join wings

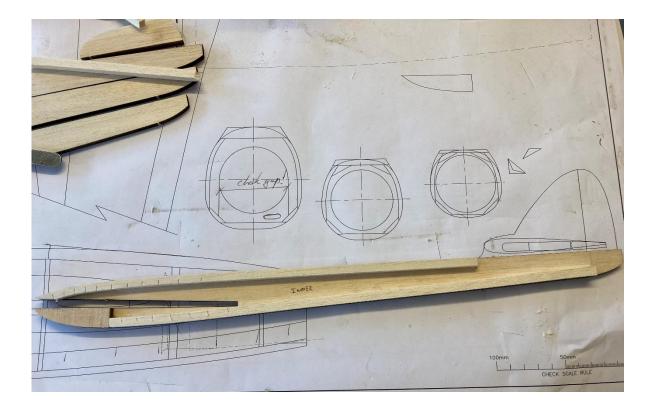

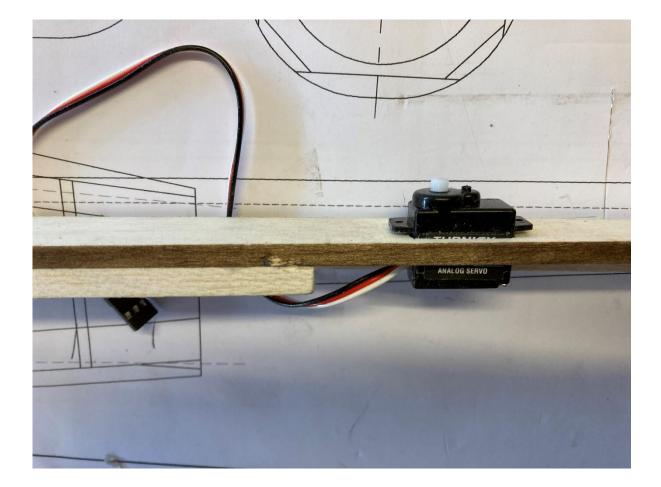

Remove wing pieces 3 & 4 to allow wing to be slid into fuselage

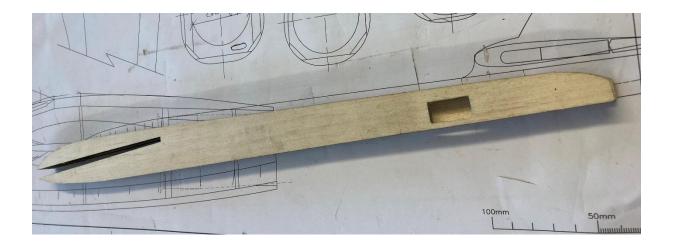

BOOMS

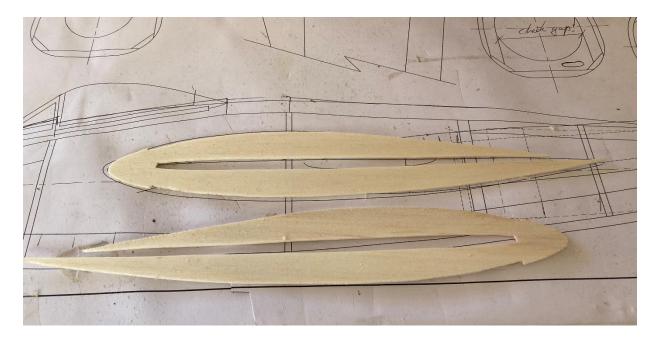

Fairings made, using template on plans

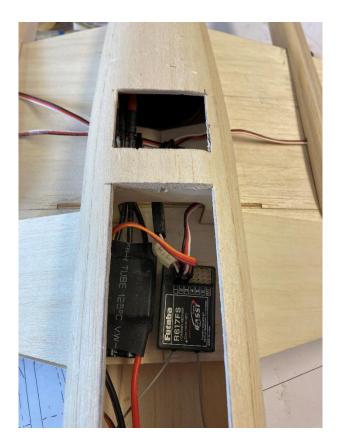

Teardrop servo cover

Aileron servo glued to teardrop cover. Servo mounting tabs shown cut and removed

Prototype- wing LE inside air intake now moved back
